PROFESSIONAL SUMMARY

“Hi I’m Radi a software engineer with a background in Computer science. I’ve experience in learning course such as bootcamp, training etc. I have completed my study in STIKI University. Currently I’m focused on building applications with sensible user interfaces to help people discover, connect, and learn with each other. My mission is to implementing a new technology in each part of live and making live more easy. I’m big fans of javascript programming language and explore each js framework. I also like playing guitar, swimming and other activities to fun for it when I’m free”
